

IGLAND 9002

Maxo TLP

IGLAND 9ton double-drum forestry winch. A professional winch that meets the requirements of strength for tough challenges that forestry equipment are exposed for. The winch is designed for mounting on farm tractors with a 3-point hitch.

The winch is equipped with electrohydraulic high-pressure operation with self-contained hydraulics with oil supply system (separate pump and oil tank), independent of the tractor's hydraulic system. This eliminates the possibilities for contamination when transferred from / to the tractor's hydraulic system and also protects the environment from oil spills, related to equipment replacement or changes.

The large drums make it possible to maintain traction over long stretches. The pull capacity is 90 kN (9 tons) for each drum. The advantage of a

double-drum winch is the ability to distribute the load on two wire ropes. This results in the timber being more manageable, which in turn results in safer and more productive working conditions.

Ideal for tractors 59 kW and stronger.

TECHNICAL DATA

Pulling capacity	90 kN (9 tons) each drum
Safety brake	Yes
Weight	877kg
Width	2.20m
Height	1.85m
