

MONRA MRF-60

The Monra MRF-60 cutting head is characterized by its great performance, capacity and the use of high-quality materials for manufacturing. This all results in its great robustness and reliability. It's designed to perform demanding, continuous work safely and easily. It is ideal for felling any type of tree. Adapts to any base machine on the market from 20 tons.

CHARACTERISTICS:

- With tree accumulator system
- Cutting capacity: 650 mm
- Treated cutting blades
- High tensile strength steel chassis
- Tilt: -20°, +20°
- Parker Hydraulic Distributor
- Maximum working pressure: 300 kg/cm²
- Height: 2,564m
- Length: 2,120m
- Width: 1,490m
